WayMeasure App

WayMeasure on the WayLink™ Platform: The platform, powered by NVIDIA Omniverse and Holoport, and controlled through AR Glasses, enables edge AI surgery with local UI and display to surgeons, and features a HIPAA-compliant, cloud-based ecosystem for transfer and real-time capabilities for uploading, sharing, analyzing, and reviewing cases and notes through a mobile app.

WayMeasure Features:

- Seamless end-to-end workflow.
- Virtual tools for distance measurement.
- Angle and area measurement tools.
- Drawing tool for highlighting structures and text annotations for measurements.

WayMeasure Cloud Storage & Management

- Offering options for recorded measurements.
- Find measurements anytime with search capabilities.
- Gallery for organizing recorded measurements, and
- Exporting measurements to user profile or on device.

WayMeasure & WayLink Combined Benefits: WayMeasure can be integrated on the WayLink workflow to make live streaming recording, upload to cloud storage, synchronization of data & view streaming and measurements a seamless experience.

W | WAYLAND

Manage case recordings, and uploads through the WayMeasure app on your smartphones.

Make measurement measurements through the WayLink platform and the WayMeasure app.
